

UTILITY FRAME FOR TAPE AND SPACKLE

The TBF22 Utility Frames allow surface mount installation of ceiling diffusers in hard ceilings for tape and spackle applications to conceal the face of the frame.

Screw fastening provides a secure installation to the ceiling. Diffusers or other devices may require independent support.

The standard 24"x24" frame will accept 23 3/4" lay-in diffusers. Other made-to-order square or rectangular sizes from 6" to 72" are available.

TAPE AND SPACKLE BY OTHERS

SCREW HOLES (STANDARD)
